

READ SAFETY DIRECTIONS BEFORE OPENING OR USING

ISOMATE® LBAM PLUS PHEROMONE

Insect Confusion Agent

ACTIVE CONSTITUENTS: 81.6g / 500 dispensers E-11-TETRADECEN-1-YL ACETATE
3.4g / 500 dispensers E,E-9,11-TETRADECADIEN-1-YL ACETATE

For management of Lightbrown Apple Moth (*Epiphyas postvittana*) in apples and grapes

CONTENTS: 500 UNITS

DIRECTIONS FOR USE – All States:

Crop	Insect	Rate/ha.	Critical Comments
Apples	Lightbrown Apple Moth (<i>Epiphyas postvittana</i>)	500-600 Dispensers	Twist dispensers loosely around branches in the upper third of the tree canopy. Use immediately prior to the first moth emergence in spring.
Grapes	Lightbrown Apple Moth (<i>Epiphyas postvittana</i>)	500 Dispensers	Twist dispensers loosely around old wood approximately 300 mm below the top of the canopy. Use immediately prior to the first moth emergence in spring.

NOT TO BE USED FOR ANY OTHER PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIOD: Not required when used as directed.

CRITICAL COMMENTS:

ISOMATE LBAM PLUS will not directly control any pest other than Lightbrown Apple Moth. ISOMATE LBAM PLUS should not be used on orchards or vineyards of less than 3 hectares. ISOMATE LBAM PLUS is effective as a sole treatment for Lightbrown Apple Moth in orchards and vineyards supporting low to moderate populations. In orchards and vineyards supporting high populations of with a history of heavy infestation, additional measures may be required to supplement the effect of ISOMATE LBAM PLUS.

ISOMATE™ LBAM PLUS - Critical comments continued

Additional measures may include elimination of alternative host plants within the vineyard or orchard which support populations of Lightbrown Apple Moth during winter and/or utilisation of biological agents or insecticides in spring and summer. If uncertain, seek advice from Bioglobal Ltd or a competent pest control adviser. ISOMATE LBAM PLUS prevents Lightbrown Apple Moth from mating. However, if a major source of mated female moths of this species is present adjacent to the orchard or vineyard, migration of these moths may significantly reduce the level of control achieved. This can be overcome by:

a. Treatment of entire, and not just sections, of large conventionally treated orchards or vineyards which frequently serve as sources of mated females.

b. Treatment of Infestation sources with ISOMATE LBAM PLUS (e.g. a strip at least 50 metres wide near the nearest treated orchard or vineyard).

c. Treatment of weeds that serve as alternative hosts for Lightbrown Apple Moth with an effective herbicide or by mowing or close grazing in winter.

Other pests must be monitored so that timely intervention with conventional insecticides is possible. ISOMATE LBAM PLUS is not harmful to bees or other beneficial insects and does not induce secondary pest populations.

APPLES		GRAPES	
Region	Time of placement	Region	Time of placement
Southern Tasmania	Mid August	Coonawarra	Early August
Northern Tasmania	Early August	Padthaway	Early August
Southern Victoria	Early August	Barossa Hills	Early August
North East Victoria	Early August	Barossa Valley	Early August
Goulburn Valley	Late July-Early August	Lower Murray	Late July-Early August
Murray Valley	Late July-Early August	Upper Murray	Late July-Early August
Barlow, NSW	Mid August	Goulburn Valley	Late July-Early August
Orange, NSW	Early August	Yarra Valley	Early August
Adelaide Hills	Early August	Riverina	Late July-Early August

The above are guidelines only and will vary to some degree from season to season and according to local microclimatic conditions. Purchasers should use their own knowledge of local conditions or seek advice from a pest control adviser in deciding the optimum time for application.

PROTECTION OF LIVESTOCK, WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT: Low hazard to bees. May be applied to crop at any time. DO NOT contaminate streams, rivers or waterways with chemical or used containers.

STORAGE AND DISPOSAL: Keep out of reach of children. Store in unopened original foil envelopes. If ISOMATE LBAM PLUS is to be held for longer than 3 months, it should be held under refrigeration at or below 5°C. Dispose of empty packets and used dispensers in municipal rubbish.

SAFETY DIRECTION: Wash hands after use.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre;

Phone Australia 13 11 26; New Zealand 0800 764 766.

MATERIAL SAFETY DATA SHEET: Additional information is listed in the Material Safety Data Sheet.

LIABILITY OF BIOGLOBAL LTD

The effectiveness of this product in managing Lightbrown Apple Moth depends upon various factors present during and after application and upon the skill and judgement of the user. Bioglobal Ltd does not accept any liability for harm or damage resulting from: 1) This product or its use; or 2) The purchaser acting on advice given in good faith by any representative of the company unless the product itself can be shown not to comply with the specifications on the label and damage results from that non-compliance. If these conditions are unacceptable to the purchaser, the goods should be returned unopened within 7 days for a refund of the purchase price.
